Professional Summary

Entry-level Java Full Stack Developer with hands-on experience building Spring Boot microservices, RESTful backends, and front-end applications, plus a background in computer vision engineering. Proficient in Java, Spring Boot, Spring MVC, React.js, MySQL, REST APIs, HTML5, CSS3, and JavaScript. Experienced in designing and implementing scalable, production-ready applications using OOP principles, MVC and microservices architecture concepts, and agile development practices.

Technical Skills

Languages: Java, JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks & Architecture: Spring Boot, Spring MVC, Microservices Architecture, React.js, RESTful API Design

Database: MySQL

Tools: Git, GitHub, Postman, VS Code, REST APIs ,Eclipse

Experience

CIIC Intel India – AI/ML & DL Engineering Intern

Jul 2024 – Aug 2024

- Configured and validated the Volvo RoboFlow computer vision system, reducing assembly line sequencing errors by 20% and improving logistics workflow efficiency.
- Developed deep learning-based image processing pipelines for automated plant disease detection, achieving 85% classification accuracy across 5 disease categories.

CodSoft – Web Development Intern

Jul 2025 – Aug 2025

- Designed and deployed 3 responsive web applications using HTML5, CSS3, and JavaScript, including a calculator, landing pages, and a developer portfolio, reducing delivery time by 25%.
- Transformed UI/UX wireframes into accessible, cross-browser-compatible web interfaces using clean code standards, improving page load performance by 15%.

Projects

Student Information Management API | Spring Boot, MySQL, REST API, MVC / Microservices-Ready Architecture

- Engineered a RESTful CRUD API using Spring Boot and MySQL with layered MVC architecture designed for microservices extensibility (service-layer separation, DTOs, stateless endpoints); validated 10+ endpoints via Postman, achieving 100% test coverage.

Advento – Travel Web Application | React.js, React Router

- Developed a scalable, component-driven Single Page Application (SPA) using React.js and React Router, improving navigation speed by 40% across all device types.

Cryptocurrency Wallet Website | HTML, CSS, JavaScript

- Built a responsive crypto analytics dashboard with simulated real-time market data; applied DOM optimization and debouncing techniques, reducing UI render latency by 30%.

WTI Shield – Web Threat Intelligence | Python, Flask, Scikit-learn, SHAP, Chrome Extension (MV3)

- Built a Chrome extension detecting SQL Injection, XSS, Phishing, and DDoS threats in real time using a Gradient Boosting model on the KDD Cup dataset — 99.6% accuracy, 0.9999 ROC-AUC.
- Integrated SHAP and LIME explainability; served via a Flask REST API microservice with a rule-based offline fallback and full extension UI showing risk scores and threat reports.

Education

Arunai Engineering College, Tiruvannamalai

Jun 2022 – May 2026

B.Tech – Artificial Intelligence and Data Science | CGPA: 8.85

Gandhi Nagar Matriculation Hr. Sec. School, Tiruvannamalai

Jun 2020 – May 2022

SSLC: 88.7% | SSC: 93.4%

Certifications

- Intel Unnati Industrial Training -AI/ML & Deep Learning - CIIC, Intel India
- Java Full Stack Development Course - FIIT Institute, India
- Simplilearn CCNA 200-301 Network Fundamentals
